PLANT AND SOIL

Contents Volumes 168–169, January–February 1995

Selected Papers from the CEC/IUFRO Symposium
NUTRIENT UPTAKE AND CYCLING IN FOREST ECOSYSTEMS

June 7–10, 1993, Halmstad, Sweden

Guest Editors: R.F. HÜTTL, L.O. NILSSON
and U.T. JOHANSSON

OVERVIEW

Preface 3

Nutrient uptake and cycling in forest ecosystems – present status and future research directions 5–13
L.O. Nilsson, R.F. Hüttl, U.T. Johansson, H. Jochheim

Plant nutrition and growth: Basic principles 15–20
T. Ingestad, G.I. Ågren

Towards an understanding of the relations between tree nutrition, nutrient cycling and environment 21–27
C.O. Tamm

NUTRITIONAL PROCESSES IN THE SOIL

Nutrient supply of forest soils in relation to management and site history 31–41
R.F. Hüttl, W. Schaaf

Soil nutrient supply in natural and managed forests 43–53
D.W. Cole

Nitrogen mineralization and potential nitrification at different depths in acid forest soils 55–66
T. Persson, A. Wirén

Nitrogen supply rate in Scots pine (*Pinus sylvestris* L.) forests of contrasting slope aspect 67–73
P. Casals, J. Romanyà, J. Cortina, J. Fons, M. Bode, V.R. Vallejo

Effects of forest fertilization on nitrogen leaching and soil microbial properties in the Northern Calcareous Alps of Austria 75–81
H. Insam, A. Palojärvi

Does nitrogen availability control rates of litter decomposition in forests? 83–88
C.E. Prescott

Decomposition and nitrogen dynamics of fine roots of Norway spruce (*Picea abies* (L. Karst.) at different sites 89–94
K. Lõhmus, M. Ivask

Quantification of ammonium sorption in acid forest soils by sorption isotherms 95–101
G. Matschonat, E. Matzner

Soil changes in different age classes of Norway spruce (*Picea abies* (L.) Karst.) on afforested farmland 103–110
A. Alriksson, M.T. Olsson

NUTRIENT AND WATER UPTAKE BY ROOTS

Roots, nutrients and their relationship to spatial patterns 113–123
K.A. Vogt, D.J. Vogt, H. Asbjornsen, R.A. Dahlgren

Measurements of abundances of ^{15}N and ^{13}C as tools in retrospective studies of N balances and water stress in forests: A discussion of preliminary results 125–133
P. Högberg, C. Johannisson, M. Högberg, L. Högbom, T. Näsholm, J.-E. Hällgren

Monitoring uptake and contents of Mg, Ca and K in Norway spruce as influenced by pH and Al, using microprobe analysis and stable isotope labelling 135–150
A.J. Kuhn, J. Bauch, W.H. Schröder

Effects of ammonium sulphate application on the chemistry of bulk soil, rhizosphere, fine roots and fine-root distribution in a *Picea abies* (L.) Karst. stand 151–160
H. Majdi, H. Persson

Root distribution in a Norway spruce (*Picea abies* (L.) Karst.) stand subjected to drought and ammonium-sulphate application 161–165
H. Persson, Y. Von Fircks, H. Majdi, L.O. Nilsson

Fine-root vitality in a Norway spruce stand subjected to various nutrient supplies 167–172
A. Clemensson-Lindell, H. Persson

Effects of aluminium on growth and root reactions of phosphorus stressed *Betula pendula* seedlings 173–178
S. Clegg, G.R. Gobran

Response of understorey vegetation and Scots pine root systems to fertilization at multiple deficiency stress 179–185
F.H. Brække

Replacement of nutrient losses caused by acidification of a beech forest soil and its effects on transplanted field-layer species 187–193
U. Falkengren-Grerup

Distribution of nutrients and phytotoxic metal ions in the soil and in two forest floor plant species of a beech (*Fagus sylvatica* L.) stand 195–202
M.W.F. Luwe

NUTRIENT, GROWTH AND ALLOCATION

Growth and shoot: root ratio of seedlings in relation to nutrient availability 205–214
T. Ericsson

Development of root biomass in an *Eucalyptus globulus* plantation under different water and nutrient regimes 215–223
A. Fabião, M. Madeira, E. Steen, T. Kätterer, C. Ribeiro, C. Araújo

The influence of stand development on nutrient demand, growth and allocation 225–232
H.G. Miller

Xylem sap composition: A tool for investigating mineral uptake and cycling in adult spruce 233–241
E. Dambrine, F. Martin, N. Carisey, A. Granier, J.-E. Hällgren, K. Bishop

A new hypothesis to explain allocation of dry matter between mycorrhizal fungi and pine seedlings in relation to nutrient supply 243–248
H. Wallander

An attempt to predict long-term effects of atmospheric nitrogen deposition on the yield of Norway spruce stands (*Picea abies* (L.) Karst.) in southwestern Sweden 249–254
O.A. Persson, H. Eriksson, U. Johansson

Seasonal development of the photosynthetic performance of Norway spruce (*Picea abies* [L.] Karst.) under magnesium deficiency 255–261
B. Mehne-Jakobs

Relationship between net photosynthesis and nitrogen in Scots pine: Seasonal variation in seedlings and shoots 263–270
E.M. Vapaavuori, A.H. Vuorinen, P.J. Aphalo, H. Smolander

Forest floor accumulation, nutrition and productivity of *Pinus patula* in the Usutu Forest, Swaziland 271–278
A.R. Morris

Effect of nitrogen on growth and water relations of radiata pine families 279–285
D.N. Fife, E.K.S. Nambiar

Effects of water and nutrient supply on amount and on nutrient concentration of litterfall and forest floor litter in *Eucalyptus globulus* plantations 287–295
M. Madeira, M.C. Araújo, J.S. Pereira

Nutrient content in *Quercus ilex* canopies: Seasonal and spatial variation within a catchment 297–304
S. Sabaté, A. Sala, C.A. Gracia

Concentrations of nutritional and trace elements in needles of Norway spruce (*Picea abies* [L.] Karst.) as functions of the needle age class 305–312
A. Wyttenbach, P. Schleppi, L. Tobler, S. Bajo, J. Bucher

Effect of P supply upon seasonal growth and internal cycling of P in Sitka spruce (*Picea sitchensis* (Bong.)) Carr. seedlings 313–317
M.F. Proe, P. Millard

NUTRIENT CYCLING IN FOREST ECOSYSTEMS RELATED TO STABILITY AND PRODUCTIVITY

Nutrient cycling strategies 321–326
N. van Breemen

Nutrient cycling in *Pinus sylvestris* stands in eastern Finland 327–336
H.-S. Helmisaari

Aboveground nutrient cycling and forest development on poor sandy soil 337–344
M.W. Rode

Effect of tree species and soil properties on nutrient immobilization in the forest floor 345–352
K. Raulund-Rasmussen, H. Vejre

Effects of irrigation and balanced fertilization on nutrient cycling in a Douglas fir stand 353–363
P.H.B. de Visser

Effects of airborne sea salts on soil water acidification and leaching of aluminium in different forest ecosystems in Denmark 365–372
L.B. Pedersen, J. Bille-Hansen

Changes in crown leaching composition induced by a sudden increase in atmospheric deposition. A case study in South-Western Bulgaria 373–382
N. Ignatova

Nutrient pools and fluxes of the ground vegetation in coniferous forests due to fertilizing, liming and amelioration 383–390
H. Rodenkirchen

Nitrogen cycling and dynamic analysis of man made larch forest ecosystem 391–397
S. Liu

Evaluation of sulphur cycling in managed forest stands by means of stable S-isotope analysis 399–404
A. Giesemann, H.-J. Jäger, K.H. Feger

Stomatal SO_2 uptake and sulfate accumulation in needles of Norway spruce stands (*Picea abies*) in Central Europe 405–419
S. Slovik, A. Siegmund, G. Kindermann, R. Riebeling, Á. Balázs

Emission of hydrogen sulfide by twigs of coniferes – a comparison of Norway spruce (*Picea abies* (L.) Karst.), Scotch pine (*Pinus sylvestris* L.) and Blue spruce (*Picea pungens* Engelm.) 421–423
G. Kindermann, K. Hüve, S. Slovik, H. Lux, H. Rennenberg

FOREST MANAGEMENT ASPECTS

Relationships between water nutrients and productivity in Australian forests: Application to wood production and quality 427–435
E.K. Sadanandan Nambiar

Nutrient balance and P, K, Ca, Mg, S and B accumulation in a Norway spruce stand following ammonium sulphate application, fertigation, irrigation, drought and N-free-fertilisation 437–446
L.-O. Nilsson, K. Wiklund

Effects of forest liming on soil processes 447–470
K. Kreutzer

Possible interference of fertilization in the natural recovery of a declining sugar maple stand in southern Quebec 471–480
B. Côté, I. O'Halloran, W.H. Hendershot, H. Spankie

Revitalization of an alpine protective forest by fertilization 481–488
W. Flückiger, S. Braun

Revitalization experiments in magnesium deficient Norway spruce stands in Austria 489–500
K. Katzensteiner, O. Eckmuellner, R. Jandl, G. Glatzel, H. Sterba, A. Wessely, R.F. Hüttl

Growth response to different types of NPK-fertilizer in Norway spruce plantations in Western Denmark 501–504
K. Dralle, J.B. Larsen

Effects of $Mg(OH)_2$-fertilization on nutrient cycling in a heavily damaged Norway spruce ecosystem (NE Bavaria/FRG) 505–511
W. Schaaf

Scarification, fertilization and herbicide treatment effects on planted conifers and soil fertility 513–522
D. Burgess, J.A. Baldock, S. Wetzell, D.G. Brand

Availability and mobility of nutrients in acid forest soil treated with fast and slow-release nutrients 523–531
T. Aarnio, J. Derome, P.J. Martikainen

THE IMPLICATION OF CLIMATE CHANGE ON FOREST RESEARCH

Effects of elevated CO_2 and nitrogen on nutrient uptake in ponderosa pine seedlings 535–545
D.W. Johnson, T. Ball, R.F. Walker

Combined effects of CO_2 concentration and nutrient status on the biomass production and nutrient uptake of birch seedlings (*Betula pendula*) 547–553
J. Silvola, U. Ahlholm

Growth dynamics in a changing environment – long-term observations 555–561
H. Spiecker

Soil respiration in a poor upland site of Scots pine stand subjected to elevated temperatures and atmospheric carbon concentration 563–570
B. Pajari

Change in fluxes of carbon dioxide, methane and nitrous oxide due to forest drainage of mire sites of different trophy 571–577
P.J. Martikainen, H. Nykänen, J. Alm, J. Silvola

Mechanisms for carbon and nutrient release and retention in beech forest gaps. I. Microclimate, water balance and seepage water chemistry 579–584
J. Bauhus, N. Bartsch

Mechanisms for carbon and nutrient release and retention in beech forest gaps. II. The role of soil microbial biomass 585–592
J. Bauhus, R. Barthel

Mechanisms of carbon and nutrient release and retention in beech forest gaps. III. Environmental regulation of soil respiration and nitrous oxide emissions along a microclimatic gradient 593–600
R. Brumme

Experimental manipulation of water and nutrient input to a Norway spruce plantation at Klosterhede, Denmark. I. Unintended physical and chemical changes by roof experiments 601–611
P. Gundersen, B.R. Andersen, C. Beier, L. Rasmussen

Experimental manipulation of water and nutrient input to a Norway spruce plantation at Klosterhede, Denmark. II. Effects on tree growth and nutrition 613–622
C. Beier, P. Gundersen, K. Hansen, L. Rasmussen

Experimental manipulation of water and nutrient input to a Norway spruce plantation at Klosterhede, Denmark. III. Effects on throughfall, soil water chemistry and decomposition 623–632
K. Hansen, C. Beier, P. Gundersen, L. Rasmussen

C and N storage in living trees within Finland since 1950s 633–638
P.E. Kauppi, E. Tomppo, A. Ferm
